## RESEARCH INTERESTS EDUCATION

Applied Cryptography, Cryptocurrencies, Security & Privacy in Blockchain, Zero-Knowledge Proofs

**Indian Institute of Technology, Bombay**, Mumbai, India

Bachelor and Master of Technology, Electrical Engineering

Aug, 2015 - June, 2020 (*Expected*)

- Cumulative Performance Index (CPI): 8.75/10.00
- Specialising in Communication and Signal Processing (Specialisation CPI: 9.68/10.00)

## PUBLICATIONS

- [1] Performance Trade-offs in Design of MimbleWimble Proofs of Reserves  
Accepted at *IEEE Security & Privacy on Blockchain (IEEE S&B)*, 2020  
**Suyash Bagad** and Saravanan Vijayakumaran.
- [2] On the Confidentiality of Amounts in Grin  
Accepted at *Crypto Valley Conference on Blockchain Technology (CVCBT)*, 2020  
**Suyash Bagad** and Saravanan Vijayakumaran.
- [3] MProve+: Privacy-Preserving Proof of Assets Protocol for Monero  
In preparation for submission to *IEEE Trans. on Information Forensics & Security* (IF: 6.21)  
Arijit Dutta<sup>†</sup>, **Suyash Bagad**<sup>†</sup> and Saravanan Vijayakumaran. (<sup>†</sup>Equal contribution)

## RESEARCH EXPERIENCE

**Shorter Privacy-Preserving Proof of Reserves Protocols and More**

Master's Thesis

*Guide:* Prof. Saravanan Vijayakumaran, IIT Bombay

**MimbleWimble-based Cryptocurrencies** [[Report](#), [Slides](#)]

May, 2019 - Jan, 2020

- Designed *RevelioBP*, a novel proof of reserves protocol for MimbleWimble-based cryptocurrencies
- Accomplished a proof size of  $\mathcal{O}(\log(n))$  in the anonymity set size, *outperforming*  $\mathcal{O}(n)$  of the existing proof of reserves protocol Revelio, enabling frequent audits by exchanges
- Strengthened the *privacy* of an exchange's outputs (addresses) by scaling the anonymity set to the entire set of unspent outputs (UTXOs) for a particular *blockchain state*
- Devised a robust cryptographic technique to enforce non-sharing of outputs by exchanges
- Implemented the protocol in Rust using *Curv*, an elliptic curve cryptography framework
- Achieved  $3\times$  *faster* proof verification than generation using a single multi-exponentiation check

**CryptoNote-based Monero**

Jan, 2020 - Present

- Conceptualized *MProve+*, a *log-sized privacy-preserving* proof of reserves protocol for Monero
- Alleviated a privacy flaw of MProve to prevent zero mix-in transactions of exchange's addresses
- Simulated MProve+ and MProve in Rust over Edwards & Ristretto curves for comparison; *boosted* proof generation and verification in MProve+ by  $5\times$  and  $20\times$  resp. through multi-exponentiations
- Exhibited conversion of Monero keys from Edwards to Ristretto to avert small subgroup attack

**Confidentiality of Amounts in Grin**

Feb, 2020 - April, 2020

- Derived *upper bounds* on the amounts hidden in the outputs (Pedersen commitments) of Grin
- Performed a first-hand *graph-based* analysis of the Grin blockchain using graph database Neo4j
- Empirically proved that although confidentiality of amounts in most of the transaction outputs is preserved, amounts in more than 900 outputs could be predicted to be in a narrow range

**Generalising Bulletproofs** [[Report](#), [Slides](#)]

Jan, 2019 - Apr, 2019

- Surveyed a variety of range proofs with a focus on Bulletproofs, the state-of-art range proof
- *Generalized* Bulletproofs for proving knowledge of aggregated statements with DL assumption
- Formulated and implemented Inner-Product Argument for non-power of two sized secret vectors

PROFESSIONAL EXPERIENCE	<b>Neuromorphic Computing</b>	R&D Project
	<i>Guide:</i> Prof. Udayan Ganguly, IIT Bombay	
	<b>Dynamic Boltzmann Machines</b> <a href="#">[Report, Slides]</a>	Jan, 2019 - April, 2019
	<ul style="list-style-type: none"> <li>Analyzed energy-based models of Dynamic Boltzmann Machines and devised an initial framework for its <i>hardware</i> realisation</li> <li>Modelled neuronal dendrites and axons as the <i>eligibility traces</i> and <i>conduction delays</i> respectively to draw parallels between Dynamic Boltzmann Machines and biological neuronal networks</li> <li><i>Outperformed</i> LSTMs in time-series prediction with comparable accuracy and 40x faster learning</li> </ul>	
	<b>Plasticity-based Learning in DNNs</b> <a href="#">[Report, Poster]</a>	Aug, 2019 - Nov, 2019
	<ul style="list-style-type: none"> <li>Incorporated brain-inspired <i>Hebbian plasticity</i> in Deep Neural Networks enhancing <i>performance</i> coupled with drastic reduction in <i>memory footprint</i></li> <li>Proposed a training strategy for the plasticity-fused models using back-propagation resulting in accuracy comparable to that of the state-of-the-art CNNs</li> <li>Manifested superior <i>noise robustness</i> in pattern recognition and image classification tasks</li> </ul>	
	<b>Cadence Design Systems   Fast 3D Convolution on HiFi4™ DSP</b>	Pune, India
	<i>Guide:</i> Mr. Vijay Pawar, Principal Design Engineer	
	May, 2018 - Jul, 2018	
	<ul style="list-style-type: none"> <li>Devised algorithms to implement <i>optimal</i> 3D and Depth Separable Convolution on HiFi4 DSP</li> <li>Achieved 40x and 24x <i>faster</i> fixed and floating-point implementations respectively compared to high-level C++ implementation of 3D convolution on HiFi4</li> <li>Designed efficient modules to implement CNN models on HiFi4 for Automatic Speech Recognition</li> </ul>	
ACADEMIC PROJECTS	<b>Neurapse - An open-source Spiking Neural Network package</b> <a href="#">[GitHub]</a>	
	<i>Guide:</i> Prof. Udayan Ganguly, IIT Bombay	
	Aug, 2018 - Nov, 2018	
	<ul style="list-style-type: none"> <li>Synthesized an open-source python package equipped with fundamental blocks of biologically-inspired Spiking Neural Networks such as spikes, neurons, synapses and networks</li> <li>Adaptive to neuronal models like LIF, AEF, HH &amp; STDP rules for Dynamic Random Networks</li> <li>Easily extensible and customizable to support computational simulation of neuronal networks</li> </ul>	
	<b>Enhancement of Low-light and Hazy Images</b> <a href="#">[Report, Slides]</a>	
	<i>Guide:</i> Prof. Amit Sethi, IIT Bombay	
	Aug, 2018 - Nov, 2018	
	<ul style="list-style-type: none"> <li>Designed algorithms for hazy image enhancement using Luminance map and Dark Channel Prior</li> <li>Accomplished 12x <i>faster</i> implementation in luminance approach enabling real-time processing in applications such as automated surveillance, remote sensing and medical imaging</li> </ul>	
	<b>Mathematical Analysis of Financial Crises</b> <a href="#">[Slides]</a>	
	<i>Guide:</i> Prof. Jayakrishnan Nair, IIT Bombay	
	Aug, 2018 - Nov, 2018	
	<ul style="list-style-type: none"> <li>Presented analysis of reasons like model uncertainty, flawed assumptions behind financial crises</li> <li>Explained the emergence of the financial crisis of 2008 due to CDOs using Banach-Tarski theorem</li> <li>Illustrated failure of VaR (Value at risk) as a measure of <i>heavy-tailed</i> risks in times of financial crisis via Dalbaen's theorem and stressed on cruciality of <i>convexity</i> of risk measure</li> </ul>	
	<b>Smart-shoes for Physiotherapy Diagnosis</b> <a href="#">[Report, Slides]</a>	
	<i>Guide:</i> Prof. Siddharth Tallur, IIT Bombay	
	Jan, 2018 - Apr, 2018	
	<ul style="list-style-type: none"> <li>Fabricated a low-power, wireless <i>shoe-sole</i> for diagnosing physiotherapeutic disorders like flatfoot, costing 24x lesser than conventional pressure mats</li> <li>Built an interface showing the heat-map of a patient's foot for continuous remote-monitoring of the patient's progress and gauge the effects of medication, using Bluetooth communication</li> </ul>	
	<b>Filter Design &amp; Mono to Stereo Audio Conversion</b> <a href="#">[Slides]</a>	
	<i>Guide:</i> Prof. Vikram Gadre, IIT Bombay	
	Feb, 2018 - Apr, 2018	
	<ul style="list-style-type: none"> <li>Designed &amp; simulated a series of discrete-time filters to extract/suppress given bands of a signal</li> <li>Explored FIR filter based <i>mono to stereo</i> conversion in time for audio quality enhancement</li> </ul>	

ACHIEVEMENTS	Selected participant in workshop <i>Foundational Aspects of Blockchain Tech</i> , TIFR, Bangalore	2020
	Commendation by the <b>Dean, Student Affairs</b> for exceptional contribution to NSS, IITB	2018
	Bagged 99.4% and 99.9%ile in <b>JEE</b> Advanced and JEE Main resp. in 1,500,000 candidates	2015
	<b>Kishore Vaigyanik Protsahan Yojana</b> Fellowship, ranked 251 <sup>st</sup> in 100,000 candidates	2014
	<b>Maharashtra Talent Search Examination</b> Scholarship	2011

NOTABLE  
COURSEWORK

Applied Math	Signal Processing	Miscellaneous
Number Theory & Cryptography	Computer Vision	Intro to Machine Learning
Advanced Cryptography <sup>†</sup>	Image Processing	Neuromorphic Engineering
Real Analysis in Engineering	Digital Signal Processing	Complex Analysis

TEACHING  
ASSISTANCE

<b>Introduction to Number Theory &amp; Cryptography</b> (130)	Jan, 2020 - Present
<b>Cryptocurrency and Blockchain Technologies</b> (22)	Aug, 2019 - Nov, 2019
<i>Instructor:</i> Prof. Saravanan Vijayakumaran, IIT Bombay	
<ul style="list-style-type: none"> <li>Responsible for evaluation of assignments, exams and designing model solutions of the same</li> <li>Mentored students with the course content and the project implementation</li> </ul>

POSTIONS OF  
RESPONSIBILITY

<b>Overall Coordinator, National Service Scheme, IIT Bombay</b>		Apr, 2018 - Mar, 2019
<i>Largest student-volunteer body in IITB serving 100,000+ people   Led a 3-tier team of 400 volunteers</i>		
OUTREACH	<ul style="list-style-type: none"> <li>Guided 1000+ freshmen to help choose NSS for course NOCS presenting the impact of our work</li> <li><b>Open Learning Initiative's</b> (1L+ subs) videos hosted on several MHRD and state govt. portals</li> <li>Led 'Letters of Love' in IITB, a global campaign for motivating refugee kids in Syria, Iraq, Iran</li> </ul>	
INITIATIVES	<ul style="list-style-type: none"> <li>Collaborated with <i>Nalanda project</i> to educate 5000+ needy kids across India using OLI videos</li> <li>Pioneered <i>field visits</i> encouraging 50+ farmers to save water using smart farming technologies</li> <li>Launched <i>Tarang</i>, a YT channel to sensitize youth on sustainability, impacting 750+ BMC kids</li> </ul>	
REFORMS	<ul style="list-style-type: none"> <li>Introduced <i>Sustainable Social Development</i> focusing on imbibing sustainability in our lifestyle</li> <li>Revamped NSS website (105% rise in visits), initiated NSS Instagram handle (500+ followers)</li> <li>Accentuated <i>conservation</i> of nature via Green Diwali, Plastic &amp; paper reuse and tree-plantation</li> </ul>	

<b>Media &amp; Design Head, National Service Scheme, IIT Bombay</b>	Apr, 2017 - Mar, 2018
<ul style="list-style-type: none"> <li>Led a team of 4 for outreach of NSS initiatives through social, print media impacting 3L+ people</li> <li>Innovated &amp; organized the 1<sup>st</sup> ever <i>NSS Summit</i> for collaborative work; 15 colleges participated</li> </ul>	

EXTRA CURRICULAR  
ACTIVITIES

- Educated students of grades 3th to 12th as a volunteer under National Service Scheme (NSS)
- Elementary proficiency in *French*, completed 5 year long course in French Language in school
- Qualified *Elementary & Intermediate* Drawing Examinations with grades *A* and *B* respectively
- Completed the Beginners' Squash Camp and participated in the 'Freshie Squash Open 2015'
- Former inter-school district-level cricketer for years 2012-13
- Awarded *Yellow Belt in Karate* with certification from Indian Jitsu-Kan
